Tilting the Motor Upwards

- Locate the tilt lock lever, usually situated on the side of the motor or near the mounting bracket.
- Disengage the tilt lock by pulling or flipping the lever, depending on your model.
- Grip the cowling or handle of the outboard and begin lifting. The spring assist will reduce the effort needed.
- Lift until the engine reaches the fully tilted position or your desired angle.
- Re-engage the tilt lock lever to secure the motor in place.

Lowering the Motor

- Disengage the tilt lock lever.
- Support the engine as you gently lower it, allowing the spring assist to ease the movement.
- Lower the motor until it reaches the operational or trailering position.
- Re-engage the tilt lock lever to lock the motor in place.

Tips for Smooth Operation

- Always perform tilting on a flat, stable surface.
- Do not force the engine if it resists movement; check for obstructions or mechanical issues.
- Lubricate moving parts periodically as recommended by the manufacturer.

- Ensure the tilt lock lever is fully engaged before operating the boat.

Maintenance and Troubleshooting of the Manual Tilt Assist

Routine Maintenance Tips

- Regularly inspect the spring and latch mechanisms for corrosion or wear.
- Lubricate pivot points and moving parts with marine-grade lubricant to prevent rust.
- Check for loose bolts or worn components and tighten or replace as necessary.
